Your Comments or Concerns

TCEQ cannot deny a permit if they have met all conditions. They do not take into account the area, local infrastructure, the wildlife, the native flora, how close and how many neighbors they have. The people of this great state are being damaged and not protected.

The companies need to to put up and keep up signage for the duration of the application

Companies need to inform land owner of permits being requested by 1st class mail.

Your Proposed Solution

TCEQ Needs to be able to deny a permit based on other issues. Such as infrastructure, available municipal services (fire water medical etc.) area usage(rural vs industrial areas) local wants.

The company needs to provide correct signage for the whole length of the permitting.

If you own property with a 2 mile radius of proposed plant, all owners need to be notified by certified mail with 3 days after the initial filing.
