Texas

**Your Comments or Concerns**

As a responsible nature concerned citizen, I am very disappointed in learning and reading about the poor job that TCEQ is and HAS BEEN doing over an extended period of time. What is the point of even having a Texas environmental quality organization, if it clearly does not go out of its way to

actually monitor our environment, and let's BIG and special Interestt groups , and Developers pretty much rule and get all the permits they want and need without any oversight?

It's just another ridiculous good ole boy Texas way of doing things, and I'm really embarrassed and angry at our so called state government, legislature , and crooked ego centric "representatives" that pretend they have the people of Texas' best interests in mind.....backhanded unethical Teas politics is ruining my state.

### **Your Proposed Solution**

it would be a BREATH OF FRESH AIR, to HIRE NEW PROFESSIONAL SCIENTISTS, ENVIRONMENTAL EXPERTS, who actually knew what their job was in detail , had a sense of high integrity , researched each and every application permit for developments, researched how these proposed developments would impact Texas' air quality, water quality, tree canopy, and were involved with other like minded environmental organizations to help them have a PLAN for how Teas can grow in the future, in a way that doesn't Destroy our natural resources!!!!!! NOT a an impossible thing to get done. It comes down to hiring people who CARE DEEPLY , about doing the RIGHT a thing for our state.
