#### **Your Comments or Concerns**

As our environmental watchdogs I have to say you could and should be doing a better job. Our water is undrinkable from fluoride and a list of other pollutants. Our air quality is killing people. We have mostly toxic farming which produces toxic food. You should be telling farmers to use regenerative farming practices. Then, there are the needed toxic waste cleanups. Some are so bad that cleaning them up might not be possible. In which case everything around them should be cleared in a large area and the site walled off. BETTER THAT IT NEVER HAPPENED. STOP ALL TOXIC DUMPING!

#### **Your Proposed Solution**

Stop industry from polluting, dumping, using toxic chemicals in whatever ways or means available to you. Propose better laws to give the agency more to work with. It's YOUR job. If you don't have what you need, get it -- within the law and constitution, of course.

**My Comments Will Be Made Public**

Yes
