Your Comments or Concerns

The Texas Commission on Environmental Quality is simply not doing its job - NOT when our air continues to be polluted - despite complaint after complaint - from concrete batch plant emissions to methane leakage from the oil and gas fields. What's the point of submitting complaints to TCEQ or TCEQ holding public hearings, only to have TCEQ just go dark?

Your Proposed Solution

Publish reports on the locations (highways? chemical/petrochemical manufacturing plants? power plants?) where our citizens' health is most at risk. Publish reports on complaints received and actions taken to enforce regulations. Publish reports on how cities are implementing (or NOT) smog controls. Bottom line - SHOW US what you are doing and whether or not it is working..
