Your Comments or Concerns

As Texans deal with 100+ degree weather starting earlier and lasting longer each year, we need protection and support from our taxpayer-funded agencies and elected officials, not studies and

deliberations by committees and workgroups. Crops are dying in the fields, water is drying up, and our economic futures are imperiled. I'm not sure what kind of future the our officials think they're protecting by kicking the can down the road, but many Texans like me are tired of seeing their hard-earned tax dollars funding useless nonsense.

Your Proposed Solution

Stop wasting time. Support and EMPOWER every agency, NGO, private citizen's group and charitable organization that seeks to address the immediate environmental threats to our children's futures
