To Whom It May Concern:

I am writing my concerns (not sure if you will even look at them) about all this cements plants that are being build around the neighborhoods, neighborhoods that are full of children, seniors, people with all kinds of health problems.

I wrote when we as a community came together to stop the permit for AGC CONCRETE BATCH PLANT! well from what I gather it got approved, my question is are you all really listening to the PEOPLE? Like I said before there are tree yes three cement plants being build within walking distance from one another, do you even care? I live in this community were all three are build all my relatives and friends live here as well!

It would make sense that if there is already one plant build in that community that you would not approve the next one coming up, right? it sure makes sense to me. Also why can't you denied the permits if they are so close to one another? or in the same neighborhood.

I just want clean air in my community for myself, my relatives and my friends. thank you

Blessings and Peace  
Coco Martinez
