Your Comments About the Staff Report, Including Recommendations Supported or Opposed:

A Texas family inherited their dog, Puffy, when Grandma went into the nursing home. She told them that Puffy was an old and trusted family member and would make a wonderful watchdog for their home. However, when the roofing companies came to town, they threw bones to Puffy who became their friend and let them dump roofing tar in the family garden, killing their vegetables, poisoning the soil, and contaminating their well water. The troubled family didn't know what to do. They loved Puffy, who was a really nice dog and reminded them how much Grandma loved him. Eventually, their ten-year old daughter spoke the obvious. Puffy was a failure as a watch dog. They should give him to the roofers and get a rottweiler. Although it was hard for the family to give up on Puffy and replace him, they did replace with him with a rottweiler named 'Panzer.' After that, the roofers stopped using their garden as a dumping ground, but by then it was really to late for this family and their home. Don't you think Texas deserves a watch dog more effective than Puffy?

Any Alternative or New Recommendations on This Agency: Replace all the commissioners with people who are not puppets of the oil and gas industry.
