Good Morning,

I would like to strongly urge against adding the PT and OT boards to the TDLR group. As a medical professional it is important that we have individuals on our board that are of a profession that is similar in nature. Our current board is designed that way. The "health professions" portion of the TDLR would have professionals that are not familiar with the intricacies of our professions advising us. It would also allow professions that have historically tried to limit our practice for their own benefit to "advise" our profession and potentially control how our practice act is worded, which could have a negative impact on the profession.

Thank you for your time,

Dr. Ryan Ardoin
