Subject: Public Input Form for Agencies Under Review (Public/After Publication)

Agency: HEALTH LICENSING CONSOLIDATION PROJECT

First Name: Gary

Last Name: Brettmann

Title: Dr. of Chiropractic

Organization you are affiliated with: Chiropractic Society of Texas

Email:

City: Mansfield

State: Texas

Your Comments About the Staff Report, Including Recommendations Supported or Opposed: I would like to state that placing TBCE into a combined Board though may be beneficial to some extent, it may also not be the best decision for regulation of the largest Drugless Health Care Profession in the World, let alone Texas. It may actually be best to keep TBCE, but have rule & guidelines which limit their poor interpretation of Statute to reflect views of another state organizations desires to expand scope of practice into what is NOT Chiropractic.

Any Alternative or New Recommendations on This Agency:

Keep TBCE, but allow only one board member to be affiliated with TCA, Appoint a representative who is affiliated with Chiropractic Society of Texas as well, and all other Chiropractic members NOT have political affiliations with any state or national Chiropractic organization unless it upholds the true Profession of Chiropractic; unsullied by any Medical Dogma, which is antipodal to Chiropractic. Chiropractic is NOT a sub-specialty of medicine but is a separate & Distinct health care discipline, which is based on Human function under the control of the central nervous system. A Chiropractor, who's main function is locating, detecting & correcting 'Vertebral Subluxations" which interfere with proper Mental/Nerve transmissions between the Brain & cells/tissues/ organs of the body, NOT just limited to the Musculoskeletal system. Any Dr. who has studied the Human Anatomy knows that the Nervous system, is housed by the Skull & Vertebra protecting the Brain & its information conduit the spinal cord, which controls all cellular, tissue, muscle & organ function of the body. Dr.'s of Chiropractic do not treat disease conditions, they care for the Nerve system integrity & overall function of the human condition.

My Comment Will Be Made Public: I agree
