Your Comments About the Staff Report, Including Recommendations Supported or Opposed: Please consider my following comments: As a registered Professional Engineer (Texas 73267) it is my opinion that professional geoscientists provide valuable input into the protection of our most important natural resource--water. The registration of geoscientists assures that the professionals who make recommendations and decisions are in fact qualified technically and ethically to be entrusted with those recommendations and decisions. The removal of licensing requirements will decrease the reliability of such decisions and adversely affect the public. The licensing of geoscientists should continue.

Any Alternative or New Recommendations on This Agency: Continue as currently required
