Your Comments About the Staff Report, Including Recommendations Supported or Opposed:

Geology is highly relevant to public safety. Professional geologists study, evaluate, and help to provide us with clean groundwater, evaluation of geologic hazards such as sinkholes, landslides, and earthquakes. The ethical practice of geology protects public health and safety and we should continue the public regulation of professional geoscientists.

Any Alternative or New Recommendations on This Agency:

The ethical practice of geology protects public health and safety and we should continue the public regulation of professional geoscientists.
