Your Comments About the Staff Report, Including Recommendations Supported or Opposed: it is my understanding that there is a recommendation to eliminate regulations regarding ignition interlock systems as there is no public safety issues. I disagree with that recommendation as regulations ensure that the ignition interlock works properly and prevents tampering with it. if people are allowed to tamper with it or to disable it then they could operate a motor vehicle while intoxicated.

Any Alternative or New Recommendations on This Agency: i would recommend leaving the regulations in place to prevent tampering or substandard companies from doing business in Texas.

My Comment Will Be Made Public: I agree
