State: Texas

Your Comments About the Staff Report, Including Recommendations Supported or
Opposed:

Dear LCRA Sunset Review Committee,

My name is Jason Ehrlich, a resident of Austin.

As you proceed through the LCRA Sunset Review process, I request that you consider the following key points to help move LCRA forward as a state agency:

Environmental & Community Health: Through ownership and operation of Fayette Coal Plant, LCRA is directly responsible for a major source of carbon emissions in the Central Texas region. I request that LCRA develop a plan to sunset Fayette and replace it with more sustainable, environmentally cleaner sources of energy that are abundant in Texas like wind or solar. The health of our community depends on it.

Planning for the Future: I request that LCRA develop a long-term plan for their water, transmission, and electric generation businesses. This plan must take climate change and population growth into account and should be made available to the general public. The City of Austin recently approved Water Forward, a 100-year plan for water resources in the city. The communities served by LCRA deserve a similar level of planning for the future.

Transparency: The people of Texas deserve to know about LRCA's electric generation resources, especially Fayette Coal Plant. The Sunset Commission should include LCRA's electric generation and transmission operations in the Sunset Review process. I suggest that the first Sunset Review of LCRA electric operations occur within three years.

Financial Responsibility: Coal plants are a losing financial investment. I suggest that the LCRA board investigate the profitability of Fayette over past 5 years and the market projections for next 5, 10, and 20 years. The results of

this investigation should be made available to the public. Fayette may be a money loser and a new solar or wind plant may be more cost effective for Texans especially in an era of higher energy prices.

Good Government: We commend LCRA on the quick, effective response to Highland Lakes flooding in October. However, by moving into the groundwater drilling business, LCRA is acting against its commitment as a good steward of water resources. This groundwater would not be needed if Fayette Coal Plant were closed.

I am eager to hear you address these key points during the Sunset Review process. As a constituent, I will continue to follow LCRA's progress in the coming months. I look forward to future opportunities to help LCRA improve as a community steward for Central Texas.

Any Alternative or New Recommendations on This Agency:

Dear LCRA Sunset Review Committee,
