Subject: in support of continuation of TBPG

To whom it may concern:

I am a licensed professional geoscientist (geophysicist) in the State of Texas (Dr Pete Emmet, TBPG #5487) and the owner and technical director of a geoscience consultancy (Brazos Valley GeoServices Inc, TBPG #5326) and I write to express my opinion that the Texas Board of Professional Geoscientists should, indeed, continue in its role of professional oversight of this important area of public interest.

My professional geoscience practice has always been in the energy industry related to oil and gas exploration and it is my understanding that I am and always have been exempt from the requirement to participate in TBPG (see [_____](#))

But since the TBPG was created I have voluntarily elected to participate in order to support beneficial governmental involvement in my area of professional practice. I support what I see as the two primary goals of TBPG:

- 1) The setting of minimum educational standards and appropriate relevant professional experience, and
- 2) The promulgation and enforcement of high ethical standards in the practice of geoscience in the State of Texas

Regards,

Dr Pete Emmet

Subject: Fwd: in support of continuation of TBPG

correction:

my licensed geoscience company, Brazos Valley GeoServices Inc is TBPG #50326 (not #5326)

Pete Emmet
