Your Comments About the Staff Report, Including Recommendations Supported or Opposed: .

Any Alternative or New Recommendations on This Agency: Enhance and update our student physicals. Considering our physicals are outdated, and ECG should be included. 80% of students that die from heart related issues have never shown any symptoms. A system that relies on self reporting is broken and ECG's can catch most heart issues. Harvard University conducted a study where an ECG caught 86% of the heart issues and the current pre participation history and physical caught 3%. Update our student physicals to include modern technology.
