Subject: Public Input Form for Agencies Under Review (Public/After Publication)

Agency: TEXAS MEDICAL BOARD

First Name: Corey

Last Name: Gehovak

Title: LMRT

Organization you are affiliated with: Orthopaedic Associates

Email:

City: Houston

State: Texas

Your Comments About the Staff Report, Including Recommendations Supported or Opposed:

I oppose this stance against wanting to abolish this unique craft that I am in. It takes skill and dedication to know all radiological procedures while help running a clinic for multiple doctors. To know ALL the special projections for each doctor as well.

To also empower the new students that look up to you for guidance to get them ready to handle a clinic, urgent care, or any other type of doctor office setting. This is an out rage.

Any Alternative or New Recommendations on This Agency:

Give all the current licensed LMRT/MRT their full RT with the option to complete school to get the Associates or Bachelor degree. Then not have the program after the current students are RT qualified.

Or even let the LMRT/MRT take the RT test for free and see if they have the skills and knowledge to pass the RT test. Once/if pass give them Associates degree because obviously the LMRT/MRT knows the information to pass, but just lacks the "official" classes to say on paper that this person sat through all those lectures on radiation. Please consider these options before you take away something like this that we have worked so hard to get and the sacrifice that we and our families have gone through.

My Comment Will Be Made Public: I agree
