Subject: Texas Medical Board

I saw the review and am shocked and disappointed that our state will not find that our agencies need oversight. I am still receiving emails daily from people who have had their loved ones harmed by medical mistakes and not one doctor is being sanctioned for it. Their licenses are not being taken or they take it and give it back so that they can go and harm others again and again.

I am not sure what it is going to take for us to get our agencies to understand that people are dying out here at massive rates and they need protection and agencies that care about human life.

It is a shame that for 12 more years the State of Texas will have no oversight and there will be no accountability for the continued harm to the citizens of this state.

What else can we do at this point to ensure the safety of the citizens of Texas?
