Subject: Public Input Form for Agencies Under Review (Public/After Publication)

Agency: TEXAS BOARD PROFESSIONAL GEOSCIENTISTS TBPG

First Name: John

Last Name: Greiner

Title: Principal Geoscientist

Organization you are affiliated with: Ninyo & Moore Consultants

Email:

City: Houston

State: Texas

Your Comments About the Staff Report, Including Recommendations Supported or Opposed: I oppose sunseting the Geoscientist Licensure Act because it provides needed protections to the public. One example is an acid gas injection well project I worked on where an oil and gas operator had not assessed the risk of an improperly plugged abandoned borehole being a conduit for deadline hydrogen sulfide to escape to the surface. A release had killed livestock and luckily no persons were hurt. I provided testimony using Class I hazardous waste injection well regulations to show that Texas Railroad Commission regulations were not effective in controlling this hazard. This is a problem that geologists are uniquely qualified to assess and bring protection to not only buyers of geoscience services but the general public as a whole. Thank you for considering my input.
John F. (Rick) Greiner, PG, CPG

Any Alternative or New Recommendations on This Agency: None, the Geoscience Licensure Act is fine as it currently exists.

My Comment Will Be Made Public: I agree
