It is about time someone stepped in to put an end to that ridiculous Facility Registration. All it amounts to was a revenue generator for the Texas Board. It served absolutely no purpose whatsoever in patient protection. I'm not sure of what measures are in place for Chiropractic offices that are not owned by licensed chiropractors, there definitely should be some sort of regulatory control or oversight on them.

I am all for getting rid of the Facility registration and I thank the commission for there position on this matter.
