Your Comments About the Staff Report, Including Recommendations Supported or Opposed:

Issue 3. targeting Barber and Cosmetology industry;

Consolidating the tow license **OPPOSED**. I feel that each licensing requires different training. Education - Cosmetology requirements a higher level of education high school diploma or a GED and the age of 17. with these requirements in place give the students a head start if they would like to go on the higher level of education, gone on the a junior college or a university to further their education and training to other avenues of the beauty business industry.

2. Eliminate all Instructor's license -**OPPOSED** the foundation in the beauty industry starts with proper training in the field. Can just anyone teach **NO** first thing you have to be able to teach, important factors that you must learn first is being able to break down a skill or it's theory so that all student can learn. as a retire Cosmetology Instructor from Kentucky and now hold a Texas license/instructor, I have learn that all students do not learn the same way as others. with out proper training as a instructor would crumble our industry. Let me ask a question; would you want some one try to teach you if had a learning disable?

3. Eliminating all wig related license - **OPPOSED** the big words this time and day is Disinfection and Sanitation, extensive training in these areas keeps us and the clients safe. Knowledge in these tow area but we have to think about scalp disorders and diseases. Human hair wigs can come infected with parasites' as well as person's own hair. think about people who are going through treatments for **CANCER**.

Any Alternative or New Recommendations on This Agency: I think maybe we might look at Kentucky and other states who has a Cosmetology Board that is run by license Cosmologist Who knows the field. As a self standing board I feel it could supports it own board.

My Comment Will Be Made Public: I agree
