## Sunset Commission Testimony

Good afternoon, I am here to express my opposition to recommendation 1.1. I feel that combining all five of the HHS agencies would be very detrimental to the blind and visually impaired. I am afraid that they would get lost in the agency mixing bowl. At this time, I am receiving services for independent living services and count on the fact that the people delivering my services are qualified to work in their specific areas. This may not be the case, if the agencies are combined. Because of this, it is my feeling that the agencies should remain separate and not be combined, as planned by this commission.
