Your Comments About the Staff Report, Including Recommendations Supported or Opposed: Most engineers do not respect nor understand land surveying, to many it is a necessary evil used only to provide data for engineering design. To expect them to have the knowledge of boundary law principles to fairly regulate this profession is a mistake that could inflict harm on the public in the long run.

Any Alternative or New Recommendations on This Agency: Let professional surveyors regulate and manage their profession, who else is better qualified to do so?

My Comment Will Be Made Public: I agree
