Subject: Sunset Report on OIG And Medicaid Fraud

Having looked at the report on the OIG and their operations, there is no doubt that there are issues to be addressed in this office. They have mishandled an issue very close to home, the dental medicaid fraud debacle. The agency is to bear a portion of the blame but they are not to bear the brunt of it. Let me tell you my personal experience.

I worked for a dentist that accepted medicaid for quite a while and claimed he was helping out the children and the state by doing so. He felt it was his "obligation" to help out "the underserved". This whole stance is a complete sham. He was on medicaid to make money and lots of it by defrauding the system. Soon one office became four and two dentists became twelve. They had systematically been taught how to defraud medicaid and become rich, all under the guise of "helping the underserved". They abused kids by papooosing/restraining just about every kid that came in and doing as much work as humanly possible to these kids on welfare all at the same time. Most of the work was not needed and yet they did all of it at once to these poor kids and never even offer the parents options of sedation or a specialist to do the work. I could write on here for days about what I have seen but I will spare you the gruesome details. Many of these dentists that will write you telling about how they are mistreated by the system are laughing behind your back at the fraud they get away with and the abuse of the less fortunate.

By all means, leave any and all payment hold in place on ALL suspected fraudsters otherwise, you will never see a dime of the money. These are first class crooks that I could list by name here until my computer ran out of power.

We need you to get these crooks to court swiftly, let them have their day in court and then go after them with CRIMINAL charges for what they have done.

Thank you,
LJ
