Dear Director:

My child, Mary B Hedrick, is a resident of the Aus St Sup Liv Ctr. She is 59, cannot speak wear diapers has very few teeth and her food must be ground. She is profoundly retarded, autistic, bipolar, can walk and would walk in front of a car if not watched over.

I am her only relative, 87 yrs of age in very poor health, on a walker, in pain constantly (osteoporosis) and have no use of left eye as I was severely injured 2 yrs ago. I do try to visit my daughter, but couldn't if it were not close.

What will happen to her if you close the facility? She is a human being and deserves being treated as such.

Sincerely,
Mary M. Hedrick
