Your Comments About the Staff Report, Including Recommendations Supported or Opposed: In my opinion, I think the commission is underestimating the value of the PG designation and the overall accountability/quality that a PG adds by reviewing and signing off on work products, which ultimately benefits the public by providing a better investigation scope of work as well as more accurate results for decision making on potential risks and impacts to public health. Removing the PG requirements will lower the overall quality in the market place and increase risk to public health. In addition, My understanding is that the TBPG actually generates revenue for the state.

Any Alternative or New Recommendations on This Agency: No
