Your Comments About the Staff Report, Including Recommendations Supported or
Opposed: The ethical practice of geology protects public health and safety.

Geology is relevant to public safety: for example, clean groundwater and proper evaluation of geologic hazards like sinkholes, landslides, and earthquakes. I recommend that you do not abolish this agency because of the good this agency does for the health and safety of people in Texas.

Any Alternative or New Recommendations on This Agency: We need to maintain this agency.

My Comment Will Be Made Public: I agree
