Your Comments About the Staff Report, Including Recommendations Supported or Opposed: As a practicing professional geologist, I support abolishing the TBPG. The stated mission has not been fulfilled and the board has proven to not be of service in protecting the public. I let my license drop as it provided no benefits for my work or for anything that I did that may effect the public. Geology is a subjective and interpretive science and having this license does nothing to validate the quality or accuracy any completed work or studies.

Any Alternative or New Recommendations on This Agency: Should some sort of governmental validation for environmental/ hydrological matters be desired, have this be recognized or registered by either the RRC or TCEQ.

My Comment Will Be Made Public: I agree
