Testimony for DPS Sunset

As a survivor of a gunshot to the head & shoulder during a home robbery by a gun not properly stored. Safe Gun Storage is personal - Safe Gun Storage saves lives and helps prevent accidental deaths. The Department of Public Safety should at the very least have a clear & wide spread state public service campaign on education for the need to safely store guns. This campaign should include but be limited to Billboards, Electronic Signs, TV ads and all other media sources.

Safe Gun Storage could help save lives. Lives of the 600+ Texas children harmed by improperly stored guns each year! Approx. 200,000 - children live in homes with loaded & unlocked firearms. Safe Gun Storage could save their lives. As a Public Safety entity of Texas - DPS - should do their job with promoting safe Gun Storage.

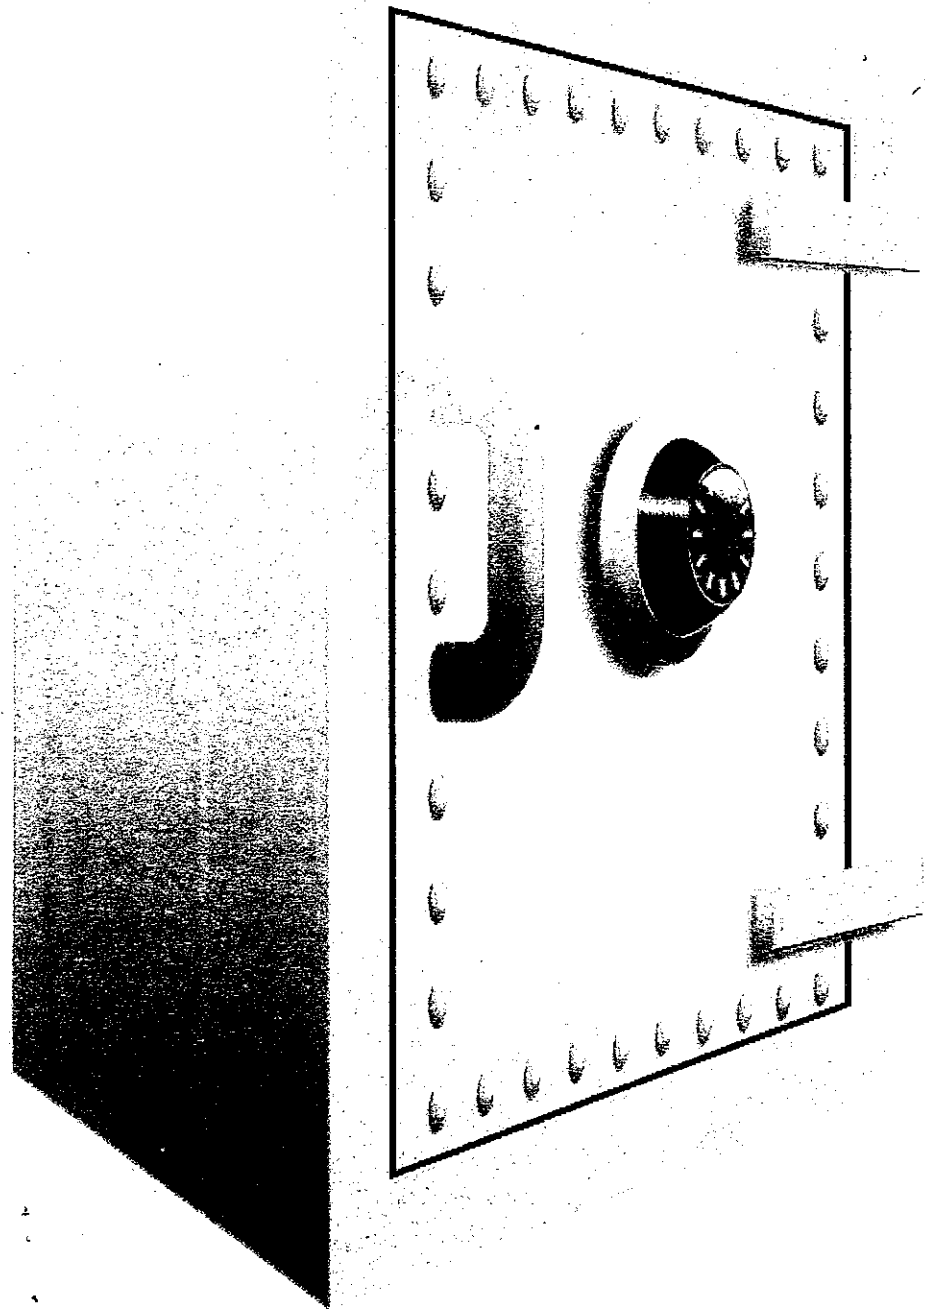

I have testified before the House, Senate, DPS Appropriation, met with our Governor's office twice = something needs to be done now!

Safe Gun Storage + education can happen.

Safe Gun Storage will save lives.

Had the homeowner of the gun I  
was shot with used ~~proper~~ and  
Safe Gun Storage, he would not have  
lost his life and I would not live  
with a bullet still lodged in my brain  
& shoulder. Safe Gun Storage  
would help change & protect the lives  
of millions of Texans. Safe Gun Storage  
does not ~~infringe~~ infringe on anyone's rights.  
Safe Gun Storage will save lives.
