Any Alternative or New Recommendations on This Agency: Enhance and update our student physicals. Include an ECG, our physicals are out dated. 80% of students that die never have a symptom. A system that relies on self reporting is broken. ECG's can catch most heart issues. Harvard University conducted a study where an ECG caught 86% of the heart issues and the current pre participation history and physical caught 3%. Update our student physicals to include modern technology.
