Subject: Plumbing board

It would be a mistake to move to TDLR

Supervision is a must wit all apprentices and young plumbers

Y'all need to research cross connections before making this decision

I would suggest talking inspectors from the city of San Antonio- since they had a case with more deaths than any other city-

It happens every day and I can assure you - a few times in your life you got sick and it wasn't because of a bug- but contaminated water

Mistakes in medical gas kills also

Do your research
