Subject: TSBPE - Sunset Review

To whom it may concern

It is my understanding That the sunset review is wanting to take my industry with the TSBPE and dissolve it in to the TDLR ? As a person that has spent his life protecting our plumbing industry working in it teaching in it I cannot believe what I'm hearing. Our industry Is in need of more in force month to enforce the plum and lasses wall and the board rules not less. The state of Texas takes more money from our industry and puts it in general fund then what they allow the TSBPE to use and operate officially. That is where the problem lies, the state of Texas should give more money back to our industry, because that would be what's best for the taxpayers of this state, after all, that's what we do is protect the safety and the welfare of the public. If you want to improve TS BPE allowed them enough funds to put up satellites locations, so that we have more places to do testing. There is a severe shortage of people that are needed in the plumbing industry at this time and we need to do education when it put it in our schools we need to do whatever's necessary to keep the plumbing industry protected and safe so that the good people that pay the taxes in the state, get what they deserve, safe water, proper drainage and gas systems that function properly without leaks, which also includes rainwater harvesting, medical gas and residential fire systems. We have been self employed as a plumbing contractor almost 33 years now and I can assure you that if you take our plumbing board and turn it in to TDLR, you will weekend the plumbing industry lot, bring it to its knees, but who am to say anything, just a Texas tax payer and somebody that makes is his living in the plumbing industry every day. May I ask who is the driving force behind trying to destroy our state plumbing board ? Is all this strictly something to do with money, it usually is?

Respectfully

Philip Sanders
