Your Comments About the Staff Report, Including Recommendations Supported or Opposed: In the cosmetology field it consists of a lot of hands with technical applications, so therefore not being able to teach face to face is more difficult and does not allow the students to experience the entire feel of what they're learning. Most importantly, learning and knowing the chemistry of cosmetology is extremely important for the students and client's health and safety. That is something that they need to learn from a professional while they are attending school and not in the salon to ensure that it's being properly taught and every one's lives and well being are in the best interest.

Any Alternative or New Recommendations on This Agency: In Lubbock, Texas there's a site to test for the written cosmetology exam but not one for the practical exam, maybe that should be considered.
