Subject: PT/OT examiners board

I would like to state my support for the recommendations of the staff report. I do not feel facility registrations are needed but, I strongly support the board's existence to monitor the practice of PT/OT in the state of Texas for public protection and accountability of licensed rehab professionals. I have been a PT for almost 30 years. The board is very important to the patients and professionals in Texas involved in rehab and promotes a continued quality of care delivered by the professions while securing quality standards.

Please strongly consider the staff recommendations,
Daphne Staha-Crouch PT
