I am a radiologic Technologist licensed in Italy and Texas. My course of studies in Italy encompasses lots of notions about the interaction between our cells and radiation. This is done in order to build up a deep knowledge and awareness about the importance of an appropriate use of radiation. Once, during my training, I have seen a Tech repeating an x-ray on a patient 7 times because he wasn't able to properly position the patient. This is not acceptable. But if people will access this profession without proper education we can expect this will be routine. I STAND FOR THE LICENSURE OF MY PROFESSION!!!! this is so important because first of all, soon or later, we will be all patients and we don't want to put our lives in the hands of people that don't know what they are doing. Education is very important! Please don't do that!
