Agency: DEPARTMENT STATE HEALTH SERVICES DSHS

First Name: Melissa

Last Name: Black

Title: Radiologic Technologist

Organization you are affiliated with:

City: Albany

State: Texas

Your Comments About the Staff Report, Including Recommendations Supported or Opposed: While most of this people interested in improving health care in the country at looking at ways to standard care it appears the state of Texas wants to just let anyone do the job. I am a health care professional. If you want to deregulate my license in the state of Texas then why not deregulate nurses and physicians. I went to school as long and longer than some RNs but we don't want to do any with their license. Why can't anyone do their job. I expose humans to radiation. Physicians are not trained to take radiographs nor or nurses. So who do you expect to over see me doing my job.

If you are going to turn it over to the federal government then maybe you should ask if they want the responsibility. I find it amazing how we say the federal government is involved in too much yet we keep wanting them to do more. Do not insult my profession's intelligence by insinuating this is to improve or maintain quality health care in the state of Texas. Shame on all of you for your suggestions concerning health care.

Any Alternative or New Recommendations on This Agency: Ensure that a plan is in place for federal government to take over or turn this over to ARRT and simply say if you are not a ARRT you do not expose humans to medical radiation in the state of Texas.

My Comment Will Be Made Public: I agree
