Your Comments About the Staff Report, Including Recommendations Supported or Opposed: Opposed. We must be allowed to keep our licenses to ensure that our patients are getting the quality of care they deserve from competent technologists. We have a standard that needs to be upheld. Making sure that technologists are properly licensed makes sure that the patients are safe from over exposure, & can trust that they are being handled by skilled individuals who worked hard to get into their profession. The patients can trust that the state will punish anyone who shows improper misconduct or handles them unsafely. Our licensure ensures that we as technologists are held to a higher standard that we must abide by to provide the safest, most compassionate, & proper care for our patients.

Any Alternative or New Recommendations on This Agency: Maintain licensure.
