Your Comments About the Staff Report, Including Recommendations Supported or Opposed: I am very opposed to this possible legislation because there is a public outcry for radiation protection and this would not instill having good and proper radiation protection skills for the general public. I have been trained to think of this during every exam and also having kids means proper shielding and I am not sure that this would be enforced when you don't need to go to school to do this job. As a mother I would be scared to see the techniques and positioning skills by someone who was not trained properly would be. I am very opposed to this for many reasons to many to count but this would be my major concern.

Any Alternative or New Recommendations on This Agency: None applicable

My Comment Will Be Made Public: I agree
