Agency: DEPARTMENT STATE HEALTH SERVICES DSHS

First Name: Evelyn

Last Name: Jolivet

Title:

Organization you are affiliated with: Retired

City: Beaumont

State: Texas

Your Comments About the Staff Report, Including Recommendations Supported or Opposed:

I am writing in OPPOSITION of the Sunset Advisory Commission's Staff Report- Issue 3- recommendation to discontinue medical radiologic technologist licensing.

It is imperative that the State of Texas continue the licensing and regulation of radiologic technologist.

- Licensure for radiologic technologists ensures that patients are being treated by individuals who have met education and certification standards.
- Licensed radiologic technologists administer ionizing radiation, a known carcinogen, in the lowest dose possible to patients to create medical images and to treat cancers and other illnesses. Unlicensed personnel do not have formalized education to administer low doses of radiation and still achieve quality images or effective treatments.
- Licensure for radiologic technologists preserves the state's right to provide disciplinary action for individuals who may not treat patients according to professional standards or administer radiation correctly. Without licensure, the state cannot protect its citizens from untrained individuals.
- Licensed radiologic technologists provide radiologists and other healthcare providers with technically consistent, correctly positioned images, which improve the consistency and accuracy of the providers' diagnosis. Unlicensed personnel increase the potential for inconsistent or improperly positioned images, reducing the diagnostic effectiveness of exams and increasing the need for repeat imaging procedures. Repeat imaging

increases radiation exposure and medical costs.

- Licensed radiologic technologists adapt procedures and technical factors to each individual patient's needs. The radiologic technologists' training allows for technologists to evaluate the patient's medical status, patient's history, underlying pathologic processes, and physical factors to create a quality diagnostic image or therapy that is truly individualized for that patient.

Maintain the Texas Medical Radiographer Licensure and be a model for other states to follow!

Any Alternative or New Recommendations on This Agency: Maintain the Texas Medical Radiographer Licensure and be a model for other states to follow!

My Comment Will Be Made Public: I agree
