Subject: State licensure

To whom it may concern,

Please continue the Respiratory Care State Licensure. It is my career and I absolutely love my job and who I work for. I believe my job as a respiratory therapist is vital to great quality patient care. I have been a respiratory therapist for eight years now. I went college for two years and was able to work as a student with a temporary respiratory care license. I am recognized as active status under the national board of respiratory care. Again, please do not remove the state licensure for respiratory care practitioners like myself.
