Subject: Form submission from: Public Input Form for Agencies Under Review (Public/After Publication)

Submitted on Sunday, June 22, 2014 - 19:47

Agency: DEPARTMENT STATE HEALTH SERVICES DSHS

First Name: chassidy

Last Name: Laws

Title: radiology technologist

Organization you are affiliated with:

City: houston

State: Texas

Your Comments About the Staff Report, Including Recommendations Supported or Opposed: I do not believe that it is right to say that Radiology Technologist do not need a license to work. It is a question of safety to the patients and the staff. Not everyone knows about the risk of over exposing patients and the long and short term effects. If you just have anyone taking x-rays you run the risk of overexposure and other factors. We have been trained specifically for this field and to say that it is not necessary to have a license is absurd. We have to keep up with our licenses through continuing education so we know about the new changes that are being mad in this field and if you decide to do away with that there will be a lot more accidents in the field. I believe that we should keep the current law of having to have a license for this field. It is more about making sure that we are being as safe as possible while caring for our patients and having people perform exams without a license is not a safe choice at all.

Any Alternative or New Recommendations on This Agency: I recommend that we keep our current law which states that you have to a license to practice in this field.

My Comment Will Be Made Public: I agree
