I just read this article regarding your upcoming proposal to deregulate certain positions in the healthcare industry.

The decision for the government to deregulate these positions is idiotic, irresponsible and dangerous. You are putting human lives at risk and degrading the importance of these health care positions.

I hope you consider the opinions of others regarding your proposal. Here are a few comments posted on the article on Facebook.

The government should take responsibility in ensuring the safety of the lives of others. They should not push their responsibilities aside to another, instead, they should take ownership.

Thanks,

Mindy
