Subject: Form submission from: Public Input Form for Agencies Under Review (Public/After Publication)

Submitted on Tuesday, June 10, 2014 - 14:17

Agency: DEPARTMENT STATE HEALTH SERVICES DSHS

First Name: Ginger

Last Name: Lewis

Title:

Organization you are affiliated with: Midwestern State University Radiology

City: Eules

State: Texas

Your Comments About the Staff Report, Including Recommendations Supported or Opposed:

Keep licensure requirement for Radiologist Technologist

- 1) licensure for radiologic technologists ensures that patients are being treated by individuals who have met education and certification standards.
- 2) Licensed radiologic technologists administer ionizing radiation, a known carcinogen, in the lowest dose possible to patients in order to create medical images and to treat cancers and other illnesses. Unlicensed personnel do not know how to administer low doses of radiation and still achieve quality images or effective treatments.
- 3) Licensure for radiologic technologists preserves the states right to penalize individuals who may not treat patients according to professional standards or administer radiation correctly. Without licensure, the state cannot protect its citizens from untrained individuals.

Any Alternative or New Recommendations on This Agency: Keep licensure requirement for Radiologist Technologist
