Subject: renew legislation on requirements for Respiratory Therapists

Sunset Commission,

Respiratory therapists need to be rigorously licensed, certified and registered. We expect the State to require these type of credentials anytime a professional is working on our lungs! Any thought of doing away with requirements for these necessary professionals should be dismissed immediately. I can think of NO good reason to lessen the current requirements of anyone working on my (yours as well) health.

Please renew the current legislation regarding Respiratory Therapists or even make more stringent.

Thank You,
Kevin McCormack
