Organization you are affiliated with: ARRT

City: PLANO

State: Texas

Your Comments About the Staff Report, Including Recommendations Supported or
Opposed:

With all the "fuss" going on about "DOCUMENTATION, DOCUMENTATION" on the radiation dose to patients and ALARA it is counterproductive and dangerous to allow someone other than a Radiologic Technologist or doctor to administer radiation. There are more and more patients coming in questioning the dose, with the internet they are able to get various ranges of "normal" for a specific exam. Dose report readings will go up. Radiation is not visible and has no odor, it is too easy to repeat and fluoro until it's right. In surgery it's a show stopper, everyone likes to stop and look again and again. It puts everyone in the room at risk. The accumulative dose for health care workers, frequent patients, hard to hold still and patients with medical conditions who visit the doctor more often will skyrocket!

Any Alternative or New Recommendations on This Agency: I recommend the Agency educate themselves, my opinion is only one of many areas that will be affected. Please read and investigate each and every comment.

My Comment Will Be Made Public: I agree
