Your Comments About the Staff Report, Including Recommendations Supported or Opposed: Related to the deregulation of the Mold regulations: While this program contains several areas where efficiencies can be attained, deregulation does serve the best interests of the people of Texas. These regulations have allowed for professionals in the industry to maintain a high level of competency and performance when it comes to assessments and remediation. The underlying issues related to mold concerns are still very much alive in the legal community and the absence of such regulations would potentially create legal ramifications that ultimately cost everyone!

Any Alternative or New Recommendations on This Agency: Create advisory board of state and industry representatives to define and refine the regulations to streamline and make a more workable policy.

My Comment Will Be Made Public: I agree
