Subject: Form submission from: Public Input Form for Agencies Under Review (Public/After Publication)

Submitted on Tuesday, June 24, 2014 - 23:01

Agency: DEPARTMENT STATE HEALTH SERVICES DSHS

First Name: Karen

Last Name: Wright

Title: Wife/mom/student

Organization you are affiliated with: Association Of Texas Midwives

City: Ft Worth

State: Texas

Your Comments About the Staff Report, Including Recommendations Supported or Opposed:

The Texas Midwifery Board is not due for Sunset Review until 2016-2017. Any changes to the make-up of the Midwifery Board or it's law or rules should be tabled until that review.

The Texas Midwifery Board should not be moved to the Department of Licensing and Regulation. The move will eliminate rule-making authority of the Midwifery Board, an ability crucial to continually improving safety and maintaining best practice standards.

In the past, the Sunset Review Commission has rejected the idea of moving the Texas Midwifery Board to the Medical Board or the Board of Nursing. These are not viable alternatives since Licensed Midwives are not doctors, nurses, or physician assistants.

Any Alternative or New Recommendations on This Agency: ACOG/TCOG have stated in their comments that "lay midwives" should have to comply with ACME standards and take the AMCB exam for certification. First, Licensed Midwives are not "lay midwives". The Texas Midwifery Board already requires standardized education for Licensed Midwives as well as the NARM exam, a 350-question, eight-hour comprehensive midwifery exam. NARM is accredited by the National Commission for Certifying Agencies (NCCA) which is the same accredits ACME. The requirements recommended by ACOG/TCOG are for nurse-midwives with an expanded scope beyond that of the Licensed Midwife and are not specialized for providing care in out-of-hospital settings. These standards would put over 200 midwives out of business, harming Texas' economy and reducing access to maternity care for thousands of Texans.

My Comment Will Be Made Public: I agree
